RULES AND ADMINISTRATION

April 4, 2023

The Honorable Jeff Merkley
Chairman
Subcommittee on Interior,
Environment and Related Agencies
SD-142
Washington, DC 20510

The Honorable Lisa Murkowski
Ranking Member
Subcommittee on Interior,
Environment and Related Agencies
SH-125
Washington, DC 20510

Dear Chairman Merkley and Ranking Member Murkowski,

I certify that neither I nor my immediate family has a pecuniary interest in any of the congressionally directed spending items that I have requested in the Fiscal Year 2024 Interior, Environment, and Related Agencies bill, consistent with the requirements of paragraph 9 of Rule XLIV of the Standing Rules of the Senate.

Sincerely,

MARK R. WARNER
United States Senator

**Warner, Mark(D-VA) Interior and Environment
Congressionally Directed Spending Requests**

Recipient Name	Project Purpose	Project Location	Amount Requested (\$000)
Charles City County	Funding will be used to construct a new gravity sewer collection system and pump station that will service the courthouse in Charles City County, Virginia.	Charles City County VA	\$4,922
Charles City County	Funding will be used to replace existing fiberglass pump tanks, septic tanks, and pump chambers with new packaged grinder pump stations in Charles City County, Virginia	Charles City County VA	\$919
Alexandria Renew Enterprises	Funding will be used to construct a combined sewer overflow (CSO) project for the City of Alexandria, Virginia.	City of Alexandria VA	\$4,000
Rivanna Water and Sewer Authority	Funding will be used to complete planning and design work on a project that will replace 21,000 linear feet of raw water piping between the Ragged Mountain Reservoir and the Observatory Water Treatment Plant in the City of Charlottesville, Virginia.	City of Charlottesville VA	\$445
City of Franklin	Funding will be used to rehabilitate failing storm sewer appurtenances and remove silt from existing retention ponds in the City of Franklin, Virginia.	City of Franklin VA	\$800
City of Fredericksburg	Funding will be used to upgrade and expand the wastewater treatment plant in the City of Fredericksburg, Virginia.	City of Fredericksburg VA	\$5,000
City of Hampton	Funding will be used to construct four different green infrastructure best management practices, including an extended detention basin, bioretention areas, tree filters, and permeable pavers in the City of Hampton, Virginia.	City of Hampton VA	\$3,200
Northeast Neighborhood Association, Inc.	Funding will be used for the interior renovation of the Historic Dallard-Newman House in the City of Harrisonburg, Virginia.	City of Harrisonburg VA	\$300
City of Manassas Park	Funding will be used to restore approximately 1,635 linear feet of an unnamed tributary of Russia Branch in the City of Manassas Park, Virginia. This project will allow for pollutant reduction credits to be applied to the City's Municipal Separate Storm Sewer System	City of Manassas Park VA	\$1,416
City of Newport News, Virginia	Funding will be used to replace functionally obsolete sewer mains in the City of Newport News, Virginia.	City of Newport News VA	\$1,000
City of Norfolk, Virginia	Funding will be used to daylight portions of a formerly filled creek to establish a large stormwater best management practice (BMP) in the City of Norfolk, Virginia.	City of Norfolk VA	\$1,000
City of Petersburg, Virginia	Funding will be used to replace and relocate an existing wastewater force main at the end of its useful life with a larger pipe that will reduce costly emergency repairs and prevent wastewater overflows in the City of Petersburg, Virginia.	City of Petersburg VA	\$4,000
City of Petersburg, Virginia	Funding will be used to repair and replace existing aging wastewater collection pipes and manholes in the City of Petersburg, Virginia.	City of Petersburg VA	\$6,000
City of Portsmouth	Funding will be used to upgrade the Race Street and Douglas Avenue vacuum assisted sewage pump stations in the City of Portsmouth, Virginia, which have experienced multiple failures in recent years due to aging equipment. The project will reduce sanitary sewer overflows and infiltration and inflow.	City of Portsmouth VA	\$4,800
City of Richmond, Virginia	Funding will be used to re-establish and improve a riparian buffer along the banks of the James River and re-route the Virginia Capital Trail to prevent runoff and increase water quality in the City of Richmond, Virginia.	City of Richmond VA	\$750

City of Richmond, Virginia	Funding will be used to convert Mayo Island in the City of Richmond, Virginia from an industrial site to a publicly accessible natural park that will improve water quality, mitigate flood potential, and provide equitable greenspace access to residents.	City of Richmond VA	\$2,000
City of Richmond, Virginia	Funding will be used to provide major upgrades to the existing wastewater treatment plant main pumping station to reliably pump over 140 million gallons per day to reduce combined sewage overflow and events in the City of Richmond, Virginia.	City of Richmond VA	\$5,400
City of Suffolk, Virginia	Funding will be used to purchase new Electrodialysis Reversal (EDR) Membranes for the G. Robert House Jr. Water Treatment Plant in the City of Suffolk, Virginia. This project will allow the City of Suffolk to improve the drinking water treatment process at the current water treatment facility.	City of Suffolk VA	\$3,000
Hampton Roads Sanitation District (HRSD)	Funding will be used provide new and updated sewer infrastructure for the counties of Northampton and Accomack, Virginia.	City of Virginia Beach VA	\$9,678
City of Virginia Beach	Funding will be used to provide stormwater infrastructure improvements within the Lake Bradford and Chubb Lake area of the City of Virginia Beach, Virginia.	City of Virginia Beach VA	\$5,000
City of Virginia Beach, Virginia	Funding will be used to construct two large stormwater pump stations, tide gates, additional stormwater storage, flood barriers, and storm drains in the City of Virginia Beach, Virginia.	City of Virginia Beach VA	\$5,000
City of Williamsburg, Virginia	Funding will be used to replace a 60-year old water main with a history of failures that serves the City of Williamsburg, Virginia.	City of Williamsburg VA	\$1,443
Northern Virginia Regional Commission	Funding will be used by the Northern Virginia Regional Commission to develop and implement a trail counter program across the Potomac Heritage National Scenic Trail to understand how individuals utilize the trail.	Fairfax County VA	\$196
George Mason University	Funding will be used to establish and pilot the Greater Chesapeake Tribal Resilience Initiative (GCTRI), to enhance the capacity of Federally recognized Tribes in Virginia to work with Virginia institutions of higher education on sustainability initiatives.	Fairfax County VA	\$994
Floyd County Public Service Authority	Funding will be used to replace the main drinking water lines in the Town of Floyd-Floyd County Public Service Authority System.	Floyd County VA	\$631
Franklin County	Funding will be used to construct approximately 7,000 linear feet of force main and gravity sewer to connect the end of the existing sewer line that dumps into a pump station directly into a wastewater treatment plant in the Town of Rocky Mount, Virginia.	Franklin County VA	\$2,735
Frederick County Sanitation Authority d/b/a Frederick Water	Funding will be used to redirect wastewater from a failing wastewater treatment plant into a larger, higher performing treatment facility in Frederick County, Virginia. The project will involve the construction of 30,000 linear foot force main that will be strategically placed to allow other failing	Frederick County VA	\$4,000
Greensville County, Virginia	Funding will be used to replace aging waterlines that have experienced multiple failures and leaks in the Town of Jarratt located in Greensville County, Virginia.	Greensville County VA	\$3,280
Halifax County Service Authority	Funding will be used to support removal of emerging contaminants in the raw water supply for drinking water in Halifax County, Virginia	Halifax County VA	\$9,000
Isle of Wight County, Virginia	Funding will be used to construct a new 750,000-gallon elevated water storage tank, extend existing water main line, and construct a necessary pump station in Isle of Wight County, Virginia.	Isle of Wight County VA	\$2,800

Isle of Wight County, Virginia	Funding will be used to extend waterline to service previously unserved low-income residents in Isle of Wight County, Virginia.	Isle of Wight County VA	\$940
Isle of Wight County, Virginia	Funding will be used to provide public sewer connection to an existing disadvantaged community where failing private septic systems have been identified in Isle of Wight County, Virginia.	Isle of Wight County VA	\$2,650
Isle of Wight County, Virginia	Funding will be used to replace identified lead service waterlines in Isle of Wight County, Virginia.	Isle of Wight County VA	\$400
James City Service Authority	Funding will be used to replace aging drinking water and wastewater infrastructure in James City County, Virginia. The project will replace approximately 3,000 feet of water mains and approximately 3,200 feet of sanitary sewer pipes in the area.	James City County VA	\$2,488
James City Service Authority	Funding will be used to improve water quality by updating an existing dry detention stormwater facility in James City County, Virginia into a Level 2 Wet Pond, which has a higher pollutant removal efficiency than the existing facilities.	James City County VA	\$413
James City Service Authority	Funding will be used to replace and relocate approximately 3,400 feet of water main that has been prone to frequent failures and is routed through a residential neighborhood in the City of Williamsburg, Virginia.	James City County VA	\$1,800
Town of Stuart, Virginia	Funding will be used to develop backup power systems for the existing drinking water and wastewater infrastructure in the Town of Stuart, Virginia.	Patrick County VA	\$1,100
Prince George County, Virginia	Funding will be used to construct approximately 2,200 linear feet of drinking water transmission line that will replace an existing waterline that is located on the Temple Avenue Bridge over the Appomattox River in Prince George County, Virginia.	Prince George County VA	\$2,400
Prince George County, Virginia	Funding will be used to replace approximately 21,000 linear feet of asbestos cement waterlines in Prince George County, Virginia.	Prince George County VA	\$6,000
Prince George County	Funding will be used to design and construct 28,000 linear feet of waterline and decommission an outdated groundwater well system in Prince George County, Virginia.	Prince George County VA	\$2,700
Prince George County, Virginia	Funding will be used to construct a new one million gallon ground storage tank, a new three million gallon per day drinking water booster station, and approximately one mile each of suction and discharge 24" diameter distribution lines.	Prince George County VA	\$6,500
Northern Virginia Regional Commission	Funding will be used to stabilize 1,000 linear feet of shoreline through a combination of rock sill structures, beach nourishments, and wetlands planting in Prince William County, Virginia. This project will reduce storm water pollution and improve water quality for the Potomac River by capturing up	Prince William County VA	\$738
Roanoke County	Funding will be used to make improvements to the parking area for the McAfee Knob Trailhead parking area located along the Appalachian Trail in Roanoke County, Virginia.	Roanoke County VA	\$3,789
Russell County	Funding will be used to construct over 20,000 linear feet of 8-inch gravity sewer line, over 7,000 linear feet of force main, and five sewer pump stations in Russell County, Virginia.	Russell County VA	\$7,500
Spotsylvania County	Funding will be used to replace an existing 200,000 gallon elevated water storage tank near the end of its useful life with a new 1,000,000 gallon elevated water storage tank and nearly 3,000 feet of waterline infrastructure in Spotsylvania County, Virginia.	Spotsylvania County VA	\$3,500
Stafford County, Virginia	Funding will be used to improve and update the Lake Mooney Water Treatment Plant in Stafford County, Virginia. Specifically, funding will be used for the purchase and installation of water treatment membranes.	Stafford County VA	\$1,363

Stafford County, Virginia	Funding will be used to improve and update the Little Falls Wastewater Treatment Facility in Stafford County, Virginia. Specifically, funding will be used to cover the cost of enhanced nutrient removal equipment.	Stafford County VA	\$500
Town of Cedar Bluff, Virginia	To replace failing drinking water and wastewater infrastructure that are resulting in leaking water distribution pipes and gravity sewer pipes in Cedar Bluff, Virginia. About 3,000 linear feet of water mains and related appurtenances and 260 linear feet of aerial stream crossing will be replaced.	Town of Cedar Bluff VA	\$572
Town of Clifton Forge, Virginia	Funding will be used to upgrade portions of the sanitary sewer collection system within the Town of Clifton Forge, Virginia.	Town of Clifton Forge VA	\$1,840
Town of Goshen	Funding will be used to replace a deteriorated water main line in the Town of Goshen, Virginia.	Town of Goshen VA	\$425
Town of Hamilton, Virginia	Funding will be used to update the existing water treatment facility in the Town of Hamilton, Virginia.	Town of Hamilton VA	\$700
Town of Leesburg, Virginia	Funding will be used restore nearly 1,600 linear feet of an existing stream channel that is experiencing significant erosion and affecting adjoining properties. It will improve water quality for the community and reduce pollutants from being discharged into waterways that feed to the Chesapeake Bay	Town of Leesburg VA	\$3,890
Town of Pound	Funding will be used to remediate the site of aa landslide, including the building of a retaining wall and improved drainage system, in the Town of Pound, Virginia.	Town of Pound VA	\$1,033
President Lincoln's Cottage	Funding will be used to support accessibility and electrical improvements at President Lincoln's Cottage (PLC)	Washington DC	\$320
York County, Virginia	Funding will be used to extend sanitary sewer service to approximately 80 properties that are currently on septic systems and grinder pumps in York County, Virginia. The project will result in significant water quality protection for the Harwoods Mill Reservoir and Poquoson River.	York County VA	\$2,500
